

Amplify your security. Protect your enterprise. Strengthen your team.

“Typical organizations that face normal budget and staffing challenges are ill prepared to leverage and maximize the benefits of EDR solutions by themselves.”

Gartner - EDR – Benefits, Concerns and Issues

by Eric Ouellet, VP Analyst ,17 July 2018 • <https://www.gartner.com/document/3882963>

What is Vigilance?

Vigilance is SentinelOne’s Managed Detection and Response (MDR) service, provided by a group of highly trained cyber-security analysts. It empowers IT/SOC teams by accelerating the detection of, prioritization, and response to advanced cyber threats, thus reducing the risk of missing a critical alert that needs attention. The Vigilance analysts assess all alerts, review raw threat data, process operations, and network connections, and analyze samples, as needed.

Monitor

Empower and accelerate your security team with expert advice

Benefit from actionable recommendations, and security event prioritization.

Coverage 365 days, 24/7

First response SLA Standard

Respond

Ensure business continuity and network hygiene in near real-time
