

SentinelOne University

Cybersecurity Training Accessible Any Time, Anywhere

Staying ahead of today's cyber criminals and adversaries requires us to stay at the top of our game. From prevention and detection to hunting and recovery, our cybersecurity skills and knowledge must evolve alongside our technology. SentinelOne University is making that evolution more accessible for security professionals of any role, industry, or location.

SentinelOne University blends the best on-demand technology courses with interactive student enablement sessions, hands-on labs, and responsive support to provide you with flexible-yet-effective options for training. With the skillset, workflows, and know-how you gain from SentinelOne University, you can not just operate Singularity with ease, but also build your organizational resilience for the future.

About Our Training Model

SentinelOne University gives you maximum flexibility with an online catalog of on-demand training courses that are accessible 24x7. Through a User Access Pack, you're granted unrestricted access to all the on-demand trainings, labs, virtual machines, associated documentation, and additional enablement sessions you may want for a full year.

User Access Packs are available in quantities of 5 users or 20 users in your organization per year.

Students may take courses or easily rewatch learning segments as often as desired; this includes any updates to existing training material, and any new trainings that are added to the catalog.

Students desiring live, instructor-led training may purchase one-time access on a session-by-session basis.

WHY ADD SENTINELONE UNIVERSITY TO YOUR SINGULARITY DEPLOYMENT?

-  24x7 Access to Expert-Led Training Courses
-  Live Instructor-Led Enablement Sessions
-  Multiple Interactive Labs for Every Course
-  Comprehensive Course Materials & Documentation

Learning Tracks for Every Role

Singularity Foundations

- Common use cases and challenges solved by SentinelOne
- Setting up multi-tenancy via hierarchy
- Introduction to the Singularity interface
- How to get help

PREREQUISITE

Singularity Administration

- Common settings
- Users and role based access control (RBAC)
- Basic integrations
- Agent installation and maintenance
- Troubleshooting compatibility

Incident Response

- Dynamic threat detection with AI
- Automated incident management, from identification & containment through eradication & recovery
- Tuning to minimize false positives

Threat Hunting

- Threat hunting theory
- Using Deep Visibility
- Manual detection and recovery
- Storyline Active Response™ (STAR)

Ranger & Ranger Pro

- Network discovery
- Endpoint discovery and identification
- Categorizing endpoints
- Identifying unsecured nodes
- Deploying agents

Remote Script Orchestration (RSO)

- Creating a remote admin, root shell
- Common use cases
- Running pre-built scripts
- Adding custom scripts

Intro to the API

- Understanding the API
- Securing the API
- Pulling data out of Singularity
- Adding information to Singularity

Ready to be at the top of your class with SentinelOne University?

Contact your account representative for details, or reach out to training@sentinelone.com with any questions.

In addition to the courses outlined above, SentinelOne University is continuously adding to and updating its course catalog to meet the evolving needs of customers.

Innovative. Trusted. Recognized.
